P. P. P., Lippman's Great Remedy, Saves a Man From Becoming a Cripple.

Mr. Asa Armons, a well-known eitizen of Jackscaville, Florida, was afflicted by a terrible ulcer. Medical skill seemed unavailing in stopping the ravages of the terrible disease. The leg was swollen and intensely painful, as the ulcer had eaten its way down to the very bone. All medicines and treatments having failed to effect a cure, the doctors said the leg must come off. Just when it seemed that Mr. Ammons would become a disabled and a crippled man, he tried P. P. P., Lippman's Great Remedy, and the reault was wonderful.

P. P. P. SAVES 41S LEG.

" Jacksonville, Fla., July 1, 1895.— Two years ago I had the worst ulcer on my leg I ever saw. It had eaten down to the bone, and my whole leg below my knee, and my foot was swollen and inflamed. The bone was swollen and painful, and discharged a most offensive matter. My physicians said I had necrosis of the bone, and my leg would have to come off. At this stage I commenced to take P. P. P. and to bathe my leg with hot castile soap suds. It began to improve at once and healed rapidly, and is to-day a sound and useful leg.

"I think P. P. P., Lippman's Great Remedy, is all a man could ask for as a blood purifier, as I have known it to cure so meterrible cases of blood poisoning in a remarkably short time. "ASA AMMONS."

New Bern Journal: The accident to Alonzo Bryan, who was injured Monday by being run over by the hose reel, seems to have been more serious than first stated, Mr. Bryan having his elbow fractured and a small bone in his leg was splintered.

Sylvia Sentinel: Judson Allen threshed twenty-two bushels of wheat from the product of one bushel sown. This is at the rate of thirty-thre bushels to the acre, one and one-half bushels of seed being the quantity generally sown to an acre.

Lincoln Journal: Esquire J. D. Ballard, of Ironton, is one of the county's best gardeners. He brought us a turnip which weighed 3 pounds, 11 ounces, and measured 11 inches in diameter. The seed from which it was grown were sowed April 20th.

Salisbury World: Tom Shedrick, the negro man who was sent up from this county for seven years for highway robbery, and who afterwards escaped from the state's phosphate mines, near Wilmington, was captured Thursday afternoon near the Yadkin river.

Monroe Enquirer: A gentleman informs us that the ants are eating chinch bugs, and that in some fields the destructive bugs have been destroyed by the nats. That is indeed good news. If Solomon lived now he would probably have still higher regard for the busy little ant.

Webster Stockton, of Advance, Davie county, lost his hand by its being cut off by a circular saw at A. C. Wood's saw mill last week. The Davie Times says that the first Mr. Stockton knew tees is: The best possible school for the least possible cost. > Raleigh Press-Visitor: A visit to Mr. W. B. Wilder's farm, two miles south of the city of Raleigh, will convince you that farming on the right line does pay. Mr. Wilder has in cultivation eighty acres of cotton, which will produce 100 bales, twenty acres in corn that will produce 200 barrels, thirtyfive head of fat hogs which will make more bacon than will supply his family and farm hands. He makes all his supplies on the farm. He says he paid out only \$250 for help and cultivates his crop with three plows.

handling this work will be out of a job. Charlotte Observer: A very distressing accident occurred in Sharon Monday. Herbert, the 2-year-old son of Mr. Chalmers Kirkpatrick, while playing in the field, was run over by a wagon and probably fatally injured. Mr. James Bost, an aged citizen of Clear Creek, fainted while sitting in his chair Monday and fell, breaking two ribs. Mr. Bost is about 80 years of age.

Concord Standard: Mr. Jesse Snotherly, of Montgomery county, in a battle in the late war, found a federal soldier between the lines, wounded in one knee, and unable to get away, while the dry leaves, etc., were conducting a fire that would have burned him to death. The unfortunate man's cries for water especially drew the attention of Mr. Snotherly and elicited his pity. He hastened to clear away the litter from around the man, and also brought him a canteen of water and left him to follow the line of duty and personal safety. Not, however, until he had given the grateful man his name and address. Here all seemed to end-but not so. The wounded federal recovered and, we are told, recently opened a correspondence with his benefactor and enclosed to him his check for \$800. PUBLIC OPINION

In commenting upon the extravagant claims of the gold newspapers to the effect that what is contemptuously referred to by the enemies of democracy as "Bryanism," is dead for all time to come, The Washington Post, one of the most conservative and impartial newspapers in the country, declares in substance that these alleged democrats are deluding themselves with mistaken ideas. The Washington Post has studied the situation carefully and from a nonpartisan standpoint, and its observations upon the political outlook at this time are certainly entitled to deep consideration. "Anyone who reads the daily newspapers." says The Post, "and who has brains enough to understand what he reads, must know that William J. Bryan has a stronger hold upon the democratic masses today than he had a year ago or at the very height of the campaign of 1896. He emerged from the tremendous struggle, defeat- . He threatens retaliation with a big R. ed, to be sure, but without the smallest loss of prestige with the undiminished respect of his followers, and his influence has been steadily broadening Constitution.

Twenty years ago John Sherman was on the stump in Ohio, telling citizens of that state that good crops were a blessing bestowed upon the just and the unjust by the all-powerful and beneficent republican party. There is dawn of prosperity. The McKinley administration has determined that there shall be great discoveries of gold in Alaska, money in payment of tariff taxes .and the prophets of McKinleyism are | Louisville Post. pointing with awe stricken admiration to the kindness of McKinleyism in providing gold in that far-off territory. Why should miners of soft coal in the valley of the Ohio or elsewhere struggle with their oppressing employers for the benefit of the McKinley tariff of 67 cents a ton on soft coal when all they have to do is to step over to Alaska and load themselves up under the superintendence of a paternal government with all the gold nuggets they can carry away?-Chicago Chronicle.

If the people think that these pleadings and these rulings interfere with justice, they must proceed to change the laws, and their proper recourse is to the legislature rather than to the rope. The Telegraph has had much to say with regard to the law's delay, but it has consistently maintained that the remedy must be found in the reform of the laws and not by the departure of judges from precedent and the letter of the statutes. Our judges must be bound by the law, otherwise we would have judicial anarchy, and no man's life or property would be safe.-Macon (Ga.) Telegraph.

A few years ago the trustees of the University of Kansas required the resignation of President Canfield because he differed from the majority of them on the tariff question. This act was universally condemned by the educators, and we may say by enlightened public opinion. It was generally stigmatized as an act of bigotry and ignorance. That it was such needs no proof. President Canfield was immediately offered the presidency of another university whose trustees were of the same political beliefs as those of Kansas, but of a higher range of intelligence. The president of another western college (President Chapin, of Beloit) was a believer in free trade and taught it in the class room for forty years, although all or nearly all of his trustees were of the contrary opinion. There was criticism in plenty among the trustees as individuals, but no question of this kind was ever raised in the board room. Probably Dr. Chapin's case was that of a large number of college presidents during his time and even now. Yet we have never heard of an institution which had lost any considerable sum of money in legacies or donations because its president or professors taught free trade. Surely no institution was ever more exposed in this way than Yale, yet it has gone on prospering and "piling up money" in spite of the teachings of Professor Sumner, who was accounted the leading free trader in the country while he held its chair of political economy.-New York Evening Post.

The President at Lake Champlain

Plattsburg, N. Y., July 29.-The president and Mrs. McKinley occupy a suite of seven rooms on the second floor in the Hotel Champlain annex, connected with the main building by corridors. The rooms are the finest in the house and have been especially finished and furnished in elegant style and taste. The president is delighted with the magnificent lake and mountain scenery. Mrs. McKinley is a good traveler and has suffered no material fatigue from the journey. The president has appeared in public only once today, coming into the hotel lobby for a short time and visiting the weighing machine where he tipped the scales at 191 pounds.

Tortured in Spansh Prisons

Liverpool, July 29.—A band of anar-chists who had been exiled from Spain T. P. Braswell, arrived here today on their way to London. Several of the members of the party were interviewed and related their experience in Spanish prisons. They said they had been fed upon salt fish and had been deprived of water for eight days at a time. The prison authorities promised to give them water if they would make confessions. Owing to this treatment one of the number went mad and was shot down in his cell. Others were branded with hot irons, had their nails pulled out and were tortured in other ways.

The Point of View

She was a sweet little woman with big brown eyes and a pretty air of determination and hardly summoned fortitude as she led a 4-year-old boy into an uptown barber shop. She took off his hat and dallied lovingly for a moment with his long yellow curls. Then she spoke to the man in the first chair, but her voice faltered and fell, and no one else could hear what she said.

In a minute the little chap was perched atop of a hassock placed in the chair, a big apron was around his neck, and the barber with comb and shears in hand, was preparing to begin his

The little woman seated herself resolutely with her face to the window and gazed straight out at the stream of teams and bicycles that filled the street, but she didn't seem to see anything of the long procession.

"Snip, snip, snip," went the shears, and still she looked straight ahead before her. Then her head began to turn slowly, but before the fatal chair came in view she had recovered her nerve and straightened herself with a little shiver, fixing her gaze once more on the opposite side of the street. But that couldn't last long. Her

hands were beating nervously on the arms of the chair, and the toe of a dainty boot made a rat-a-tat-tat on the tiling. She shifted uneasily in her seat, and pretty soon her head turned again, very slowly this time, until she could see the devastation the shears had wrought. One side of the little chap's head was

already shorn of its long locks, and the unfeeling tonsorial artist held another curl at full length. "Snip," went the shears. The little woman gasped and a big tear rolled down her cheek. She flicked it off, but the barber's task was nearly finished before she trusted herself to speak.

Then she swallowed hard, tried to smile, and said in a strained, wapply voice:

"They're almost gone now, baby." "Yes," responded the youngster with an approving glance at his reflection in the mirror. "I guess Dick won't call me a little girl any more."-Chicago
